Professional Summary

Dynamic Full Stack & Founding Engineer with **2.5+ years of experience** building high-scale real-time web and mobile applications using **React.js, React Native, TypeScript, Node.js, and MongoDB**. Proven track record in designing virtual transactional ledger economies, optimizing WebRTC video/audio streaming, and scaling real-time socket engines. Expert in building end-to-end architectures from scratch, deploying with AWS/Docker, and integrating AI/LLM agents. Highly adaptable and suited for Frontend, Backend, Fullstack, and Founding Engineer roles.

Technical Skills

Languages	TypeScript, JavaScript (ES6+), HTML5, CSS3, PL/pgSQL
Frontend & Mobile	React.js, React Native (Expo/CLI), Next.js, Redux Toolkit, Tailwind CSS, Lucide
Backend & Architecture	Node.js, Express.js, REST APIs, Microservices, Socket.IO, WebRTC, Deno Edge
Databases & Caching	MongoDB (Aggregations), PostgreSQL (RLS), Redis (Pub/Sub), Supabase
Cloud & DevOps	AWS (EC2, S3), Docker, Google Play Console, CI/CD, Firebase Admin SDK
AI & Tooling	Agentic AI, RAG Pipelines, LangChain, Git, Razorpay SDK, GetStream SDK

Professional Experience

Full Stack Engineer <i>RescueClick Pvt. Ltd</i>	Aug 2025 -- Present Pune, India
- Spearheaded the end-to-end architecture and deployment of high-traffic fintech and live-streaming platforms using React Native, TypeScript, and the MERN stack. - Engineered highly concurrent, event-driven backends utilizing Redis Pub/Sub, WebRTC, and Socket.IO, significantly reducing real-time video and audio latency. - Developed and secured 80+ production-grade REST APIs; implemented PostgreSQL RLS and complex MongoDB aggregations to secure financial ledgers and optimize query speeds. - Orchestrated CI/CD pipelines, containerized applications with Docker on AWS EC2, and independently managed end-to-end Google Play Store production releases.	
Associate Software Engineer <i>Career Survival Japan</i>	Jan 2024 -- Aug 2025 Remote
- Led the technical development for Japanese B2B clients, delivering scalable web platforms with responsive UI and robust backend workflows. - Managed project pipelines using Asana and collaborated with international team members using strict Git-based version control and CI/CD deployment strategies.	

Projects

Dhansource Capital -- Fintech Loan Management Platform <i>React Native (Expo), Node.js, Express.js, MongoDB</i>	2025-26 Website Play Store
- Built a comprehensive fintech loan management and agent onboarding platform with an Expo-based mobile app and admin dashboards. - Implemented complete loan application lifecycles (Business, Home, Personal) with dynamic PDF generation/signing using pdf-lib and automated KYC verification. - Optimized data flow with React Hook Form and Yup validation; implemented real-time notification alerts with Socket.io-client.	
ASNARO & Client Platforms -- B2B E-Commerce <i>React.js, Redux Toolkit, Node.js, MongoDB</i>	2024 Live Link
- Delivered a highly scalable e-commerce and business management platform for Japanese clients featuring responsive UI components utilizing React.js, TypeScript, and Tailwind CSS. - Built secured backend APIs and business logic utilizing Node.js, Express.js, and MongoDB. - Implemented critical platform features including robust JWT authentication, automated quotation systems, invoice management, and real-time messaging layers.	
RingBuzz -- 1-on-1 Real-Time Audio/Video & Token Economy <i>React Native, Supabase, PostgreSQL, WebRTC, Deno Edge</i>	2025 View Case Study & Screenshots
- Architected and built a real-time 1-on-1 audio/video calling mobile app featuring a dual-token ledger economy (Pearls/Stars) and advanced stream moderation. - Integrated GetStream Video & Chat SDK to facilitate low-latency audio/video calling and real-time messaging, alongside GetStream Moderation tools to ensure compliance and real-time flagging of violating content. - Built a high-reliability background VoIP wake-up notification service with Firebase (FCM) and Notifee to wake up killed devices. - Designed PostgreSQL PL/pgSQL transactional triggers and Row Level Security (RLS) to prevent double-spending and ledger fraud. - Integrated Razorpay SDK checkout secured by serverless Deno Edge Functions with SHA-256 HMAC cryptographic signature validation.	
Funzo -- Real-Time Live Streaming & Interactive Social Platform <i>React Native CLI, Node.js, Redis, Socket.IO, AWS</i>	2025 View Case Study & Screenshots
- Developed a microservices-inspired live streaming and PK battle social platform supporting 500+ concurrent WebSockets per stream. - Integrated Agora RTC for low-latency global video feeds and PK battle video rooms; implemented real-time PK battle score engines via Redis caches with 500ms pub/sub updates. - Built interactive virtual gifting with sequenced 60fps Lottie animations managed cleanly by Redux. - Engineered secure wallet modules and high-speed media uploading using AWS S3 and Firebase Admin SDK for push notifications.	

Education

B.Tech -- Electronics and Telecommunication <i>CSMSS Chh. Shahu College of Engineering</i>	Aug 2021 -- Aug 2024 Chh Sambhaji Nagar
